## 8065 Collection

The **8065 collection** is a unique blend of occasional tables with styling and design influences from the Post Industrial period with added interests from 18th Century antiques. The look of this collection blends architectural elements of design with elm solids and veneers, specifically chosen due to the inherent grain patterns that give a very structured appearance, yet subtle and inconsistent enough to allow a look of casual elegance. Several pieces have been developed using hand-forged steel with a textured surface treatment, allowing the items to blend nicely in the collection and affording an eclectic appeal.

*Pierced carvings in intricately detailed apron rails.*

*Post-Modern styling that incorporates solid woods, metal frame rails and exposed construction bolts that accentuate the overall design.*
