The Original...Newport Glider

Glide with Pride

Great quality -great pride

Here on the lake-shore in Northern Vermont, we at Newport Gliders are inspired daily by the beauty and strength of our natural surroundings. This translates into a pride that goes into every glider rocker we make. From our home in Vermont to facilities and residences across the world, we hope you love our gliders as much as we love making them.

Quality furniture from start to finish

Newport Gliders builds furniture to last. Starting with the finest New England hard maple and red oak, every piece of wood is dip-stained, hand-wiped, sealed, sanded and lacquered to a perfect finish. We offer an impressive array of factory-ready fabrics and colors. For a one-of-a-kind piece, our "Customer's Own Material" program allows customers to provide us with the fabric they want for the chair that's perfect for them. It all adds up to a solid piece of furniture that will be a source of pride and comfort in any home.

Simply the best

Backed by a lifetime guarantee on our bearings, we at Newport Gliders have built our reputation on manufacturing the best glider rockers on the market. Thanks to our impeccable standards, quality craftsmanship, and attention to detail, Newport Glider customers can invest in a glider rocker that will serve not just them but their entire family for generations to come.

Health Care Collection

Safety

Stain-resistant Crypton fabrics provide a moisture barrier, which makes for easy clean up if you have spills. Cushions are easily removable and the optional padded armrests are comfortable.

Internal precision bearings have been vigorously tested for 7,000,000 cycles with 350 lbs.

Custom designed bearing holder is designed to eliminate any pinch points.

Unique horizontal foot stabilizer prevents our Glider from tipping sideways.

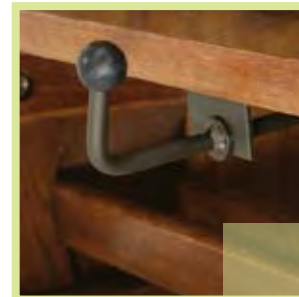

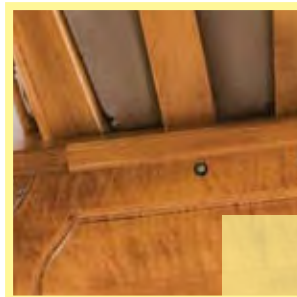

All wood plugs have been removed to prevent any chocking hazards.

Optional side Locking mechanism locks glider so exiting is easier.

A second lock in the back of the chair over-rides the side lock for complete safety and control.

Glider meets Cal.117 or Cal.133 requirements.
